

ARMKOR

Air Cargo Handling Warehouse Facilities Management

Welcome to Armkor , the UK's premier specialist material handling and warehouse facilities maintenance company.

Air Cargo Handling, Equipment Manufacture and Maintenance.

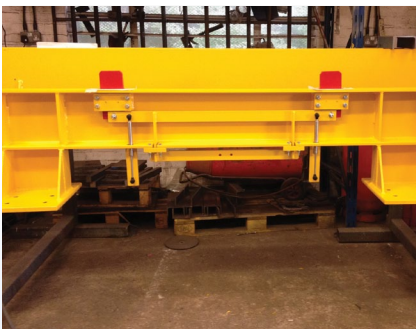

The company employs highly skilled and motivated staff providing a 24 hour, 365 day a year rapid response service to our customers, both contractual and non-contractual. In addition to the maintenance service offered, Armkor has developed its production capability by continually investing in tooling and highly trained staff to manufacture strong and reliable cargo systems and equipment.

We have designed, fabricated, installed and modified air cargo systems for various company leaders within the UK. Our cargo handling services include:

- Planned Preventative Maintenance Software (PPM)
- Conveyor systems
- Fabrication
- Cargo Handling Solutions

Manufacture, installation, maintenance and removal of:

- Barriers
- Racking (European Standard EN15635)
- Dock Levellers

General Steel Fabrication.

Armkor offers a bespoke fabrication service to our customers, ranging from our in-house design team through to our City and Guilds qualified fabrication team who carry out both mild and stainless steel fabrication.

We can fabricate both new products and repair damaged or older products.

Our fabrication products include:

- Gates – manual or automated
- Gas bottle storage vaults *
- Gas bottle cages
- Man cages
- Security cages
- Fencing panels
- Protection barriers
- Gantry

*Fire-rated.

Please contact our office on 01753 582200 for assistance with any specific fabrication requirements.

Bespoke Fork Lift Repairs

- Back guard manufacture
- Back guard repairs
- Fork blade repairs
- Axle repairs
- Mast repairs carried out to customer's request
- Bracket repairs

Service led, quality driven.

With our headquarters close to Heathrow Airport, our team of fully qualified and experienced engineers cover the whole of the UK.

Warehouse Solutions and Planned Preventative Maintenance (PPM).

Armkor provides a full range of warehouse solutions which includes general maintenance, refurbishment and ongoing Planned Preventative Maintenance.

We design, supply and install any equipment necessary to ensure your facility runs efficiently, smoothly and cost-effectively. Our services include:

- **Cargo handling/material handling systems**
- **Conveyor systems**
- **Fabrication**
- **Electrical – rewiring, installations, PAT testing**
- **Refurbishment**
- **Automated gates, barriers and fencing**
- **Racking – installation, maintenance and removal**
- **Warehouse doors – installation, maintenance and removal**
- **Planned Preventative Maintenance software (PPM)**

Manufacture, installation, maintenance and removal of:

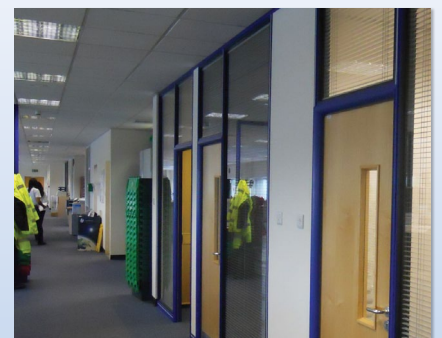

- **Barriers**
- **Dock levellers**
- **Mezzanine floor**

Facilities Maintenance and Office Refurbishment.

As a natural progression we have taken on facilities works alongside the warehouse maintenance services. Over the last two years this is an area that has shown real growth within Armkor. To this end we now employ a dedicated facilities engineering team. Works undertaken include:

- **Office installations**
- **Office refurbishments**
- **Air conditioning**
- **Heating and plumbing**
- **Carpet tile installations**
- **Painting and decoration**
- **Electrical works**
- **Emergency lighting and PAT testing**
